Final Project Proposal

My final project will be a Notes Book. This Notes Book will allow user register their own account and save the notes in their account. There are three cordata which are userinfo, itemlist and item. In the userinfo, there are two attributes username and password. In itemlist, there are title and time. In item, there are title, time, content and mood. It will have Implement a custom view that performs non-trivial custom drawing that exists for a justifiable reason and Allow the user to interact with the device camera and/or photos.
